\* Indicates required question

Email \*

☐

Record 2022.shreyash.das@ves.ac.in as the email to be included with my response

Name of the Candidate \*

0 points

Your answer

Class \*

☐

D20A

☐

D16

Roll Number \*

Your answer

**Computer Based Information System (CBIS) has \***

1 point

- ☐ Hardware, Software, Database and Network
- ☐ It has Information Processing Tool
- ☐ It is Tiny Computer System
- ☐ It is Very Large Computer System

**People who are experts in particular Subject area are \***

1 point

- ☐ Knowledge Workers
- ☐ Informed Users
- ☐ Analysts
- ☐ None of the Above

**Which of the following is a key component of a Management Information System (MIS)? \***

1 point

- ☐ a) Hardware
- ☐ b) Software
- ☐ c) Data
- ☐ d) All of the above

**The primary goal of a Management Information System is to: \***

1 point

- ☐ a) Manage employees
- ☐ b) Support decision making
- ☐ c) Store large amounts of data
- ☐ d) Control financial transactions

**What does the term "TPS" stand for in the context of MIS? \***

1 point

- ☐ a) Transaction Processing System
- ☐ b) Technical Processing System
- ☐ c) Total Processing System
- ☐ d) Transaction Production System

**What is the main function of a database in an MIS? \***

1 point

- ☐ a) Generate reports
- ☐ b) Store and retrieve data
- ☐ c) Manage hardware
- ☐ d) Monitor network traffic

**Which of the following is NOT a type of information system? \***

1 point

- ☐ a) Executive Support System (ESS)
- ☐ b) Decision Support System (DSS)
- ☐ c) Human Resource Management System (HRMS)
- ☐ d) Transaction Manufacturing System (TMS)

**In MIS, the term "big data" refers to: \***

1 point

- ☐ a) Large-scale databases that store customer information
- ☐ b) Extremely large datasets that may be analyzed computationally
- ☐ c) Data generated by big companies
- ☐ d) Data used only in executive reports

**What is the main purpose of a Business Intelligence (BI) system within an MIS? \***

1 point

- ☐ a) Automate data entry
- ☐ b) Provide real-time transaction processing
- ☐ c) Analyze and present data to support decision making
- ☐ d) Control operational systems

**In the context of MIS, what does the term "data warehousing" refer to? \***

1 point

- ☐ a) Real-time processing of transactions
- ☐ b) Storing large amounts of data for future use
- ☐ c) Cleaning and validating data
- ☐ d) Providing networking infrastructure

**Which of the following is an example of an operational level system in MIS?**

\* 1 point

- ☐ a) Payroll system
- ☐ b) Executive Information System (EIS)
- ☐ c) Decision Support System (DSS)
- ☐ d) Business Intelligence (BI) system

**In an MIS, what is the role of a Decision Support System (DSS)? \***

1 point

- ☐ a) To perform routine data entry
- ☐ b) To automate all organizational processes
- ☐ c) To assist managers in making decisions by analyzing data
- ☐ d) To generate financial reports only

**Which of the following is a key function of a Database Management System (DBMS) in an MIS?**

\* 1 point

- ☐ a) Creating physical storage devices
- ☐ b) Managing and organizing data
- ☐ c) Developing software applications
- ☐ d) Generating random data

**Which of the following best describes "data mining" in the context of MIS?**

\* 1 point

- ☐ a) The extraction of physical data from storage devices
- ☐ b) The process of discovering patterns and relationships in large datasets to generate useful insights
- ☐ c) The management of data backups and recovery processes
- ☐ d) The manual entry of data into the system

**Which ethical framework is primarily concerned with respecting and protecting individual rights?**

\* 1 point

- ☐ a) Utilitarianism
- ☐ b) Rights-Based Ethics
- ☐ c) Common Good
- ☐ d) Virtue Ethics

**A decision by an MIS department to implement a public health tracking system that benefits society as a whole, even if it involves some privacy concerns, reflects which ethical framework?**

\* 1 point

- ☐ a) Rights-Based Ethics
- ☐ b) Common Good
- ☐ c) Utilitarianism
- ☐ d) None

**Which of the following is the primary goal of information security? \***

1 point

- ☐ a) To reduce costs
- ☐ b) To protect the confidentiality, integrity, and availability of data
- ☐ c) To increase productivity
- ☐ d) To ensure data redundancy

**What is the role of "people" in an Information System? \***

1 point

- ☐ a) To manufacture computer hardware
- ☐ b) To design and develop software
- ☐ c) To input, manage, and interpret data, making decisions based on the information provided
- ☐ d) To provide electricity for the system

**Which of the following is an example of an Enterprise Resource Planning (ERP) system? \***

1 point

- ☐ a) Microsoft Excel
- ☐ b) SAP
- ☐ c) Adobe Photoshop
- ☐ d) Mozilla Firefox

**Which of the following best describes an Information System (IS)? \***

1 point

- ☐ a) A network of computers designed to communicate with each other
- ☐ b) A set of components and resources that collect, process, store, and distribute information
- ☐ c) A database used for storing large amounts of data
- ☐ d) A software application designed for word processing
